PET IR LAMPS

Infrared Halogen Heater Emitters

TOSHIBA infrared halogen heater emitters are powerful heat sources comprising a finely coiled tungsten filament surrounded by high-purity tubular quartz glass and a kind of halogen gas-filled emitter. Halogen cycle ensures constant infrared efficiency all the lifetime with preventing the quartz glass tube from blackening. TOSHIBA infrared halogen heater emitters match numerous kinds of industrial process with benefits of instant & contact-less heat, clean, odorless, compact, high-power, and long-life.

Benefits and features

- **Long life** : 5000h on average.
- **High speed** : within a second to switch on.
- **High efficiency** : more than 85% heat efficiency of full power
- **High power density** : up to 110 W / cm
- **High controllability** : neither ballast nor special circuits are necessary for basic usage.
- **No air draughts** : because of radiation (like solar energy)
- **Clean and odorless** : no risk of contamination over environment or target object to be heated.
- **Extensive assortment** : many types of voltage, wattage, length, base, cables, universal burning position is available.
- **Flexible** : special emitter designing service on demand is available.
